Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/29/2005 has been entered.

Authorization for this examiner's amendment was given in a telephone interview with Alexander Zinchuk on 10/18/2005.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: the ignition device for an explosion operated power tool comprised of a displaceable support with an insulator, a pin shaped electrode and a channel located inside the support and an annular electrode surrounding the support, such that a spark is formed and extends longitudinally down through the channel to the annular electrode to ignite a cartridge is distinguished over the art of Heeb and Mitchell, which does not disclose a channel arranged inside a support, which allows a generated spark to travel longitudinally through a channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
